Upper Secondary English and Language Acquisition: A Practical Guide to Effective Teaching. Influencing the Workplace A Practical Guide to Effective Teaching.The present invention relates to an electrophotographic photosensitive member, and more particularly to an electrophotographic photosensitive member having a sensitivity adjusted in the surface potential. An electrophotographic photosensitive member which is used in electrophotographic reproduction to form an image is generally constituted of a photosensitive layer which is a photoconductive layer formed on a conductive base. The surface of the photosensitive layer is charged by various methods, and thus exposed to form a latent electrostatic image. The latent image is then made visible by a development process including a step of adhering toner on the latent electrostatic image, and a step of transferring the image. The charge on the photosensitive layer must be removed when the photosensitive member is discharged, and the residual electric potential must be reduced to a predetermined potential. These steps are called "cleaning", and the materials for cleaning are called "cleaning agents". To accomplish superior cleaning ability, the cleaning agent is generally composed of a surfactant which is insoluble in the photoc
